March 29, 1976...Jeffrey: as I told Dan last night, assuming that the farmers want me to come out...if I could set up a good base to work from, I'd stay out there longer, working for the farmers. Say, a boat or a houseboat with TV...with perhaps a jazz club nearby (I love jazz, and never get any out in this isolated location). I will not be at work all of the time on my map mechanism...and might as well have some fun while I'm at it. And the more fun I have on the side, the longer I'll feel like staying. Of course, Teddy, age 6, will be with me.

Now, under separate cover am sending newsclippings covering our previous demonstration. I do not feel, Jeffrey, that you can have the whole picture unless you see all of these clippings...and realize how many weird, mysterious things happened while the area was encapsulated! Anyway, I haven't been able to assemble all of the clippings onto sheets...and couldn't get the set xeroxd anyway...so will do the next best thing. Just send it all to you to look at and, if you deem it advisable, have Dan or a friend put it together into categories as I have started to do. Anomalies; fires (there were, I believe, an unusual amount of fires in the Frisco area during the demonstration...so it is possible that the other-dimensional forces at work could cause fires...as in some poltergeist phenomena)...odd things that people did (remember that I told you in advance OD force might push some people over the edge during the demonstration)...freak accidents...power blackouts (there were so many)...earthquakes (the pattern of them is interesting)...and so on. Perhaps Millie might be willing to put all of this file in order; I do not know if she has the time or the inclination. At any rate...in the event that you do not wish to go into the file, please return it. And after you have finished with it, later on, if you do...please return it at that time for my records.

Ted

President of China
Peking
China

China has a terrible drought. I can give China all of the rain that it needs. I specialize in the field of parapsychology and psi-force. For years I have been giving demonstrations of weather-control based upon my ability to communicate with UFO intelligences and bring it about. Scientists in the United States are familiar with my work: Dr. Allen Hynek, Dept. of Astronomy, Northwestern University, Evanston, Illinois; Drs. Targ and Putoff, Stanford Research Institute, Menlo Park, California; Dr. Max Fogel, International Research Scientist for Mensa, Sumneytown Pike, Gwynedd, Pa., 19436...and others. Much of my work is solidly documented. In other words, I can move myself and my family to Hong Kong, establish residence there for one year...and work daily with my "UFO connection" and bring the rains to China in enormous amounts...all that China needs. Would require your sending me \$500,000 in advance then after China has all of the rain that it needs...you provide me with a final payment of \$500,000...then my family and I will leave Hong Kong and return home. It is most important for China...that you take this letter seriously.

Sincerely,

Ted Owens (PK Man)

Jeffrey...
~~Further~~, do you realize
that the militants
right now... are within
one block of the White
House? I, e., the
marginal area where
I predicted militants

2) would strike!!
(I was off on the
time of the happening
by a few weeks.)

~~Ted Owens~~

Dr. Rynok
Dr. Sprinkle
Jeffrey Hishlove

Gentlemen:

The demonstration which will be given, beginning March 11 for 90 days...conceivably might not be given. In which case you will be notified of the cancellation. Most probably, however, it will go on as scheduled.

This demonstration, unlike most of my own former demonstrations... will be produced and performed by the UFO intelligences with whom I have worked for long years, the SIs. They urged me to perform it; but I feared that someone might be injured or killed. They are sensitive to my likes and dislikes, so they are doing it themselves. The demonstration will be surrounded by other-dimensional controls to try and not injure anyone. A delicate procedure, under the circumstances.

The demonstration: The SIs are going to rock the West Coast with earthquakes...up, down and sideways. Not to cause destruction and injury, but to shake the humans up in that geographical area. It will be done in such a fashion...they tell me...that there will be no doubt about the unusualness of it (since that area is earthquake prone anyway and has many.)

The demonstration will be accompanied by power blackouts, UFO appearances, and weird, unusual happenings.

The purpose of the demonstration: if it is difficult to impress scientists and government agencies, then simply pick them up and shake them until their teeth rattle.

My critics will scoff and say, "well, there are earthquakes anyway in that area." So, all right...let's wait and see what the SIs will do for a rebuttal to that.

Incidentally, the file that I just sent you...is my own, primitive, layman's file. It is a confidential "pilot" experiment being done by Jeffrey Hishlove...who has not yet even evaluated it, or considered statistics on it, etc. I merely sent to you what I have always sent to you...the general over-all file, completely unscientific...and I might add, completely confidential, so that Jeffrey can complete his paper on it. Actually, I should have held up on mailing it to about 20 of my personal contacts...but due to an extraordinary circumstance I deemed it necessary to get it out to you at this time. It is...for your eyes only (pardon the expression).

Sincerely,

Ted Owens (PK Man)

Owens

*Will appreciate very much receiving
the copy of Psychic mag where of you speak.
Ted*

Dear Jeffrey:

I shall welcome the new material which you are going to xerox and send. Sounds interesting, for the file.

I'll be interested to hear what Hynek has to say to you. You ask for my previous involvement with Hynek. Years ago he wrote to me and told me that Dr. Leo Sprinkle had informed him, Hynek, of my work...and that they had checked me out thoroughly...and I had "received a clean bill of health." And would I keep him abreast of my work and documentation at all times. This I have done. He has a great, voluminous file of my work, through the past years. The volcano thing was most interesting. Mt. Etna in Sicily exploded...sending hot lava downward toward towns below, which lay directly in the path of the rolling lava. I informed Hynek immediately that I would (1) either "freeze" the lava in place, or (2) make the lava miss the towns. No one gave the towns a chance...and the people fled. I worked for weeks, in my own way, with the SIs...and either the lava flows stopped just short of the towns...or changed their course and went around the towns. Not a single town was destroyed or inundated with the lava. I have the complete, documented file on it. Hynek had, in the beginning, answered me, telling me not to bother controlling the volcano, to just let "Nature take its course." I answered him back that I intended to stop the volcano attack just the same, and reminded him of the many times that I had worked with Nature to obtain miraculous results.

I must adhere to the SIs letters of instruction (see your England file; the three letters of the early 70's...specifically stating SI instructions with regard to world drought.) Either humans, and countries, will listen to the SIs...and follow their relatively simple instructions...or they will just remain stricken with drought. As they wish. And as you know...the SIs are not interested in a farmer here or there...and a few thousand will not provide me with the base and security which the SIs are bent upon my getting, in order to work in a more efficient manner for them and with them.

As for "contingent upon the rain occurring"...absolutely not, Jeffrey. When Barbara Walters was paid five million dollars for five years work...was it contingent upon her being successful at it? No. When your top pro basketball or football player is paid millions...is it contingent upon whether they win or not? No. Look, all the SIs are asking...is for one million...not three or five...in order for me to save the West Coast alone five to ten BILLION dollars in drought damage. And included in my work will be the watering of not only the West Coast and far West...but the Midwest, also. In short, I will make my regular map mechanism...telepath to the SIs daily...FOR A FULL YEAR...and a full three-fourths of the United States will be slated for rainfall for a full year. (To undertake a major work of changing many patterns necessary for rainfall...including upper jet streams...simply to satisfy one farmer for a week's rain...is ridiculous; hilariously funny just to think about. I am sure that you would agree.)

If this country has an ounce of brains somewhere in its makeup...and I am beginning to doubt it...it will hustle up that million for me and give me a letter from the President requesting my cooperation in ending the drought. That...is what the SIs want. The country is hurting badly and needs water... the SIs want me to have a base and security. The SIs and I can deliver all the rainfall this country can stand, and then some. (Just as in England.) (We cannot "train" the SIs. My dog might as well try to train and educate me.) What we can do...for relief from killing drought...is go along with the SI plan.

March 26, 1977

Dear Jeffrey...

an unexpected twist has come ab out...which will enable me to do business with your "farmer friend" who mentioned \$2,000 for me to come out for a week to work for rain on an area.

I have to do something this coming September, which will take about \$3,500. It is a confidential matter (that is, I have been sworn to confidence, so cannot divulge the details)...but suffice it to say that its importance... eclipses the tight SI rules that I am under re the drought...so that I will be allowed to relax the rules in this one instance.

Therefore, for \$3,500 in advance (cashier's check) and a round trip airplane ticket...I will come out to California and work two weeks for this gentleman and his friends.

I reckon it might sort of be considered a swap...and I have SI approval for it. But the September happening is important enough to bend the rules; the SIs and I have communicated upon it and agree on that point. So if your farmer friend is still interested...I'll come out and go to work.

Owens

PS...I will always only work on a money in advance basis...no "contingent" upon anything. I figure that my time alone is worth more than the sum in question, tell him. Oh, yes...and I will throw in any lecture you might want at that time.
