

April 15, 1980

Dr. Jeffrey Mishlove

If, perchance, you are putting this "World Power Attack" file together and following it intelligently...then you must be becoming shocked, and frightened, as I am.

Being the only human who could do such a thing...I have taken an "idea" and applied psi-force to that idea, utilizing the alien half of my brain to do so. Moreover I have "joined" with my alien UFO contacts and their other-dimensional power...also have "joined" with the ancient Egyptian power entity that I am linked with telepathically...and their infinite powers (each quite different) have joined mine to knock out "power"...any kind of power...electric, nuclear, oil, gas, coal, etc...all around the world.

And in this ever-expanding file the pattern of results is easily observable.

Let us assume that D. Scott Rogo is accurate in his book...as he may well be...and that what I am really working with is an infinitely-intelligent over-all Intelligence which he has named "The Phenomenon" (but which I prefer to think of as "The Force"...well, what's in a name, eh? They both are the same thing.

The Force seems to be able to go through, under or over any obstacle to reach its end. It seems to be able to utilize animals (see the raccoon herein); inanimate objects (see the car herein); human error; storms; lightning attacks; hurricane winds; tornadoes...any and all things to reach its end...which is, in this case, to knock out "power".

If anyone wants to argue "co-incidence" such as stupido Hynek...this file has too many cases, and varied cases, which would rule out coincidence.

Since this demonstration seems to be following the usual pattern or results...then I expect that, as time goes by, the power will increase in "the idea" and bigger and more dramatic happenings will occur than what has occurred so far into this experiment on my part. So far the largest "area" of power knock-out has been Puerto Rico...all of Puerto Rico. It might well be that The Force will, eventually in this experiment, knock out the "power" in an entire country...even, although it might sound unbelievable...knock out the power over the entire world! It would seem, on the face of it, totally impossible...but from what I have observed of the results of my UFOs and PyrCre, the Egyptian power...and "The Force"...absolutely nothing is impossible!

Sincerely,

Ted Owens (PK Man)
