TO WHOM IT MAY CONCERN

My name is Ed Busch, and I have a radio-host show for Station WFAA, Dallas, Texas.

Ted Owens, known as "The PK Man" and "The UFO Prophet" was on my show by telephone hook-up to Cape Charles, Virginia, in February of this year, 1974.

On that show, being skeptical of the claims of Owens that he could cause weather to be controlled over an area...by collaborating with UFO's that he alleges to communicate with, and work with...I requested to Owens, with my Texas audience listening, that he make it snow at that time in Texas. (The weather was unusually warm, and it certainly would have been 'freakish'.) But Owens declined, saying that that was not how he did things.

Then Owens sent me a letter, stating that he, working with the UFO's, would produce a "major demonstration" of weather control over Texas. Following Owens' letter...Texas was struck by an earthquake, 4.5 on the Richter Scale.

Then Texas was struck by high-wind and tornados.

Then Texas had the coldest weather occur ever in its history.

Then Texas was struck by hot winds...that destroyed half of the Texas wheat crop.

I am submitting this statement of fact to Owens at his request.

It is true and accurate to the best of my knowledge.

Whether Owens had any connection with the above weather phenomena,

I do not know; perhaps it was mere coincidence.

But I am stating the plain facts as they occurred, at Owens' request.

Ed Busch

Texas Panhandle Wheat Lost

AMARILLO, Tex. (AP) — The Texas Panhandle's dryland wheat crop is lost, the victim of a severe drought, bugs, and several weeks of hot, blustery winds.

The cost to farmers: \$160 million, perhaps more.

Officials in Washington say the impact nationally is minimal. The U.S. Department of Agriculture says that with the exception of some drought areas of New Mexico and western Texas, this year's crop is "generally good in all areas of the nation." And dealers note that wheat prices, while somewhat higher, don't appear to be reflecting the Texas drought.

But the economy of the Panhandle, already crippled by plunging cattle prices, is headed for another shock.

Texas usually produces about 5

per cent of the nation's wheat, much of it grown in the Panhandle.

If there had been a decent rainfall by April 15, some of the crop might have been salvaged. There was little rain.

"In this immediate area I don't think any dryland wheat can be saved," says Arnold Prichard of the Producer's Grain Corp.

With no water, the wheat never had a chance. Any sprigs surviving the dry spell were snapped off by insects, mostly green bugs.

Even irrigated wheat has suffered from drought and bugs.

"Our irrigation wells have to have some help from mother nature," says Milton Johnson of the Producer's Grain Corp.

Prichard tells of an irrigation farmer near Bovina, Tex., who watered his 600 acres five times, sprayed insecticide three times,

and says now: "Hell, even if wheat was \$5 a bushel I couldn't get my money out of it."

Knowledgeable producers forecast a Texas wheat crop of less than 50 million bushels, about half the 1973 harvest.

"When we have a wheat loss in Texas it touches everybody somewhere — this is spending money," says Bill Nelson, executive vice president of the Texas Wheat Producers Association.

Nelson, who put the wheat loss at \$160 million, said the loss simply plucks that much from the national cash register.

The drought is so bad that there was no young wheat suitable for cattle grazing. Farmers rent their land to cattlemen in winter and spring when the wheat is two or three inches tall, then the cattle are removed and the crop matures.

April 27, 1974...Mr. Ed Busch, Radio WFAA, Dallas, Texas

I am still awaiting the signed statement of fact...which I assume, in all fairness, you will supply me.

By that I mean...I "worked" for you...to supply your listeners in Texas with a "miracle" of freak weather, at your own instigation. Therefore a simple admission of you to the quite obvious success of same, would not be unreasonable.

Now...you can add to the "Texas Miracle File", which is what I call it...the above. So far, since your challenge and my accepting it...Texas has had (1) an earthquake, (2) a tornado attack, (3) some of the coldest weather in the entire history of Texas, and now, (4) "weeks of hot, blustery winds"...which, incidentally, seem to have knocked out the wheat crop in Texas. Sorry about that...but the SI's promised amplified heat, you know (see the original letter); and they promised a "major demonstration."

Texas, it seems...is certainly getting one! And, in variety.

Ed Busch

PS...The giant UFO is still up there, hanging over Texas, invisible...causing effect...and will not move away until I signal it to do so.

May 14, 1974

TO MY SCIENTISTS

As if the Texas Miracle I have just completed...was not enough...now you have more!

See the Ed Busch file I sent you...note that I talked with Mr. Busch, live on Radio program out of Dallas (by telephone hook-up)...and told him that at that moment there was a giant UFO over Dallas...with the purpose of creating "freak" weather there, in Texas. (Following which came an attack of tornados; record cold; and hot winds that wiped out half the wheat crop. I had previously given him a statement in writing that I would ask the UFO's to create freak weather...and four days afterward Texas had an earthquake. This just previous to the "giant UFO" remark.)
above

Now, this, just occurred before the enclosed "UFO flap" over the Dallas-Fort Worth airport.

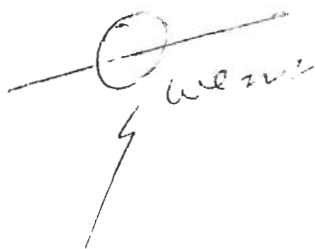

Note that Mrs. Hodgson expressed a specific opinion...that UFO's are attempting to contact humans on earth. I have explained on the Ed Busch Show, and other shows, that when a human sees a UFO...that UFO programs them for something. So, logically, I am sure that the UFO Miss Hodgson saw...programmed her to express the above opinion.

Therefore...it is quite exciting...that after I had stated over live radio to Dallas, Texas...that a giant UFO was indeed there...then these UFO sightings occurred (and an actual photo was taken)! Not to mention the concrete "proof" of the freak weather that appeared on cue...to substantiate my statements!

It all ties together into a complete picture. Yes?

One other tiny detail...which is significantly interesting to me. The UFO in the newsclip...shined down its searchlight on a Mexican family. Now, on the Ed Busch Show I went into great detail, not once, but on two different radio shows...of how the UFO's modified my brain while I was isolated on the desert IN MEXICO! (Many times before I have explained to you how the SI's "talk" by their actions; i.e., the Bigfoot that grabbed Mrs. Owens' hair at Grosse Point, Michigan...the UFO in the target area of Virginia (my "Project Alien" experiment in collaboration with Dr. Fogel) seen by Policeman Owens...thus tying me to these specific happenings.)

So...here in this file...you have more explosive material yet. Please add it to the "Ed Busch Radio Show" file.

Are UFOs taking 'a look at Dallas-Fort Worth airport?

By BILL CASE

Times Herald Metropolitan Staff

Are Unidentified Flying Objects (UFOs) and their crews maintaining regular observation vigils on a hill along the west boundaries of the Dallas-Fort Worth Airport at night?

Five witnesses from three families have told airport officials and Federal Aviation Administration officers they believe something like that may be happening.

All report numerous UFO takeoff sightings and extremely low level flights westward away from the airport during the hours of darkness between 9 p.m. and 1 a.m. The flights

occurred during the last six to eight months, they said.

Mrs. Sandra Hodgson, 36, a medical technician employed at Irving Community Hospital, who lives in an apartment complex at 2805 Mustang Drive, Grapevine, told The Times Herald she has had numerous sightings en route home from work.

"After sighting the lights, which seem to travel and hover at just about tree-top level, on several nights I reported the UFOs to the FAA control tower at D-FW Airport and to George Burlage at the FAA's Fort Worth regional headquarters," she said.

"They advised me to try and get a picture of one so I got out my camera on Thursday night and, when a UFO appeared east of our apartment building about 200 yards away, I took a shot."

Mrs. Hodgson's picture shows a small jagged twisting yellow light against a pitch black sky. No size or shape of the object is discernable. However, it appears to be moving west from left to right in the classic patterns of the UFO flights away from D-FW airport.

Fascinated by the phenomenon. Mrs. Hodgson said one night last week while watching the unusual lights she and a friend, Debbie Carter, 17, who lives in the same apartment complex, got in their car and followed it.

"It stopped down a small road over a patch of woods about a mile east of us and beamed a strong white searchlight down into a clearing," she said.

"When we got there the light was still hovering in the air over a clearing where a Mexican-American family live in a converted construction building."

Mrs. Hodgson and Miss Carter said they found Mr. and Mrs. Lucio Perez and his brother, Leonardo Perez, standing in the clearing looking up at the light.

Perez, who does not speak English, took Mrs. Hodgson's photo of the UFO and pointed to the same place in the sky where she and Miss Carter said they saw the object with its searchlight hovering directly over them."

He also indicated with gestures the UFO lights appeared to be coming from the field at the edge of the airport. The point they indicated where the lights took off is on a hill providing a panoramic view of the entire airport.

Reporters who trudged through high grass and weeds to the fence line reported they found a circular area of grass and weeds about 20 feet in diameter twisted down in a clockwise pattern. It appeared something had set down on them.

Mrs. Hodgson, who said many of her neighbors have seen the lights but do not like to discuss them, believes occupants of the UFOs are attempting to contact humans on earth.

"But judging from accounts of the way people have acted toward UFOs and their occu-

pants in other sightings elsewhere, I guess they feel we are hostile," she said. "But I'd give anything to contact them."

The only noise Mrs. Hodgson said she has heard during a sighting was a hum similar to that of an electric generator.

UFO SIGHTING?—The tiny light appearing in a twisting pattern in this photo is a UFO which Mrs. Sandra Hodgson of Grapevine says is keeping watch on the Dallas-Fort Worth Airport.

FOUR OF THE FIVE witnesses who say they have seen numerous UFOs taking off at night from a remote western area of the Dallas-Fort Worth Airport point to the spot they say one of them landed in a clearing in the woods.

Mr. Ted Owens
Box 48
Cape Charles, Virginia 23310

Dear Mr. Owens:

I am one of the Ed Busch Talk Show "faithfuls" and
your appearances on the Show are indeed high points
as far as I am concerned.

Am enclosing an intriguing write up which appeared in
the 12 May Dallas Times Herald. I feel quite certain
YOU know the UFO are there. The interesting thing is
it is a RARE occasion that a newspaper will give print
to such a report.

I would much appreciate receiving one of your discs
if I'm approved.

Thank you.

Sincerely,

Jean S. Cabeen

April 29, 1974

Ted,

Just a note wondering if you could be available for a short phone interview on Friday, the 3rd of May. I've had many calls from listeners wondering when you are going to appear on the show again and I thought this Friday would be a good night seeing that we have the most listenership on that day.

I've been getting all the mail you have been sending and unfortunately I have lost the verification paper that you wanted me to sign. I would appreciate it if you would send along another.

Either myself or my wife, Michele, will give you a call sometime this week to see if the Friday appearance would be possible for you.

Talk to you then.

Sincerely,

Ed Busch
