October 1981

Ted comments on article in National Enquirer

Also is picture of a book or article that Ted Owens wrote but the article wasn't there—only the title page. I did a very quick Internet search and it created a connection to the Albuquerque museum 1962-1980. A New Mexico connection also reminds me that I believe Jeff said one of the largest collections of articles related to UFOs in located in the Albuquerque area. It might be worth a trip to see what info they have on Ted Owens.

The book how to contact Space People is on Amazon Canada and also in Kindle Edition. 90 pages. A book. 90 pages. There was also a 2012 version on Ebay.

The book cover and a reference to National Enquirer were stapled together so I made a copy and put them into the Special Reports folder.
