

May 16, 1974  
Dear George:

*Long* *Leave Dallas 9 AM to Frisco, on Delta*  
Am planning to fly to Frisco from Dallas... Monday, May 27... and will be at the Bayside Motor Inn, wherever that is. ~~XXXX~~ Do you suppose you'd be interested in meeting me at the airport and giving me a lift into town? (I get lost around the block.) Will leave Dallas in the morn. ~~get there in the aft. United flight.~~

You won't believe... the beautiful, lovely wrap-up of the Texas Miracle! Wait until I fill you in on it! The SI's put their 'signature' on it... by showing their craft (which I said on live radio to Ed Busch in Dallas... was over Dallas) over the Dallas airport, and allowing a photo to be taken of it!

If we miss connections... my phone at the Bayside Motor Inn will be 467-8811.

Haven't had a vacation in a long time... need one, to take the pressure and tension off... and when not training my pupil... will be looking for some fun of some kind. Tennis, anyone? Ha ha! Wish I could find a fun-type female to squire me around Frisco while there. Oh well.....  
Best.....

Ted Owens--PK Man

C O P Y

May 14, 1974  
Editor - Dallas Times Herald  
Mr. Bill Case - Dallas Times Herald

Recently I have appeared on your Dallas WFAA Ed Busch Radio Show several times...by telephone hookup from Cape Charles, Virginia. I work under the observation of four top scientists. Enclosed is a signed affidavit from one of the top scientists, which is self-explanatory. These scientists...do not expose their names and reputations to kooks or crackpots, you know. They all wrote to me, and requested to be allowed to observe my work carefully.

A bit of background is necessary now. In February I was challenged, by Ed Busch, over his radio show from Dallas (live on the air) to produce "freak" weather in Texas. I accepted his challenge...and some days thereafter Texas was struck with an earthquake; following this, on a later Ed Busch show hook-up, I told him and his listening audience...that there was a giant UFO over Dallas...there to produce "freak" weather over Texas. That very night...a huge storm center began OVER TEXAS...produced tornados and hurricane winds...and extended a thousand miles to Virginia, where I was talking from. (This is all documented thoroughly...Mr. Busch has the documentation on it.) Next Texas was struck by the coldest weather in its history. After that came hot winds that blasted half the Texas wheat crop. After that...came your article... of May 12, by Mr. Case...re the UFO being sighted, and photographed...in the Dallas-Fort Worth airport area. My...UFO...as I stated on the Ed Busch Show. By the way...I will appear on the Ed Dubovitz (?) radio show next Monday afternoon from 1-3...believe it is WRR.

Ted Owens (PK Man)

*Ted Owens*

May 11, 1974

TO MY SCIENTISTS

(Today I read, with great amusement, The Daily Star, or National Star...some new weekly publication...that listed the "top psychics" -- and I was not among them. Extremely humorous. Now to business.)

I trust...that the enclosed signed, notarized affidavit will impress you sufficiently.

This "Texas Miracle" was not performed just for my 45 contacts...you scientists included...but for all of the thousands, or perhaps hundreds of thousands (?) of Texas listeners to Radio Station WFAA in Dallas, Texas...and especially for Mr. Ed Busch, a topflight (in my opinion) host for that radio show.

I was challenged by Mr. Busch, <sup>on live radio,</sup> an open-minded skeptic, but skeptical nonetheless...to produce "freak" weather over Texas...to prove my connection with the UFO intelligences, and to prove my own powers. I accepted his challenge, both in writing, and on a telephone hookup from Cape Charles, Virginia, to Dallas, Texas.

Following came earthquake, tornados, record cold, then hot winds that knocked out half the Texas wheat crop.

Mr. Busch is in no way responsible for the damage to Texas wheat...I am, solely. I regret it very much...because I sympathize with the plight of the hard-working farmers, fully. It is just...that the UFO's that I work with...saw fit to do it.

All right. It is rather obvious...to anyone other than an absolute idiot...that I did in fact, through my UFO contacts...control the weather over the State of Texas. Now...for an even larger demonstration.

See the enclosed newsclip, "Nations to Study Weather". Sixty-six (66) nations, in fact. This giant undertaking by 66 nations will encompass 20 million square miles...will begin June 15...and last 101 days. This...is the type of major demonstration which I enjoy...because it can demonstrate the enormous powers...invested in me by my UFO's (SI's).

Thus, I put it on record (as I did verbally on Mr. Busch's WFAA, Dallas, radio show last night) that the UFO's and I intend to harass and heckle this "unprecedented project"...GARP, Global Atmospheric Research Program...by using my powers ("My"...=UFO) to cause freak accidents in the exercise, power failures, weird mishaps of all kinds, freak weather for the exercise, magnetic and electromagnetic disturbances, storms, lightning attacks, and the total result...of a "Keystone Cops" operation straight out of a Mack Sennett comedy.

Probably no word...of the mishaps and freakish happenings...will be ALLOWED to leak out. But on that large scale of operation...SOMETHING should leak out...and I will then have The Garp Miracle.

# Nations to Study Weather

By AL ROSSITER JR.

WASHINGTON (UPI)—Scientists, ships, planes, buoys, and satellites from 66 nations will study the weather and seas of a third of earth's tropics this summer in the largest such international scientific expedition ever mounted.

Some of the world's most advanced environmental measuring instruments will gather information on a 20-million-square-mile band of land and sea from the eastern Pacific across the Atlantic to the western Indian Ocean.

The goal of the unprecedented project is to close a major gap in meteorology and build an understanding of the role the tropics play in shaping earth's global weather patterns. This knowledge is expected to help scientists devise ways to eventually predict weather a week or more in advance with reasonable accuracy.

The atmosphere's circulation is driven by heat from the sun. Half the sunshine that falls on earth goes to the tropics and that is the only area to receive more energy from the sun than it loses in radiation back into space.

Much of this surplus heat is stored in the tropical oceans and then is transferred to the air. It is carried upward in massive tropical cloud systems and transported around the world by high-level winds.

"This area is the boiler of the giant heat engine that runs our atmosphere," said Dr. Verner Suomi, chairman of the U.S. committee for the Global Atmospheric Research Program (GARP). "We want to better understand the parts of the global weather machine and how it runs."

The project is called GATE for GARP Atlantic Tropical Experiment. It is sponsored by the World Meteorological Organization, a specialized agency of the United Nations, and by the International Council of Scientific Unions.

The 101-day study will draw on 4,000 scientists and other personnel, 38 ships, 65 buoys, 13 aircraft, and six kinds of American and Soviet satellites to observe conditions from the top of the atmosphere to 5,000 feet deep in the oceans.

## Summer Look at Tropics

The experiment has been in the planning stage for five years and is scheduled to begin June 15. American logistics aircraft already are flying to the project headquarters in Dakar, Senegal, and some of 12 Russian ships to participate have left port in Vladivostok.

For its part, the United States will supply nine ships operated by the National Oceanic and Atmospheric Administration (NOAA), the Coast Guard, the space agency, University of Miami, Woods Hole Oceanographic Institution, University of Rhode Island, and Texas A&M University. Eight U.S. aircraft will take part along with several civilian and military weather satellites, including a new generation weather watcher scheduled for launch May 16 from Cape Canaveral.

Dr. Robert M. White, NOAA administrator, said at a news conference held by 18 officials that the project will cost \$53 million. Russia and the United States are each contributing about \$18 million.

During the experiment, weather systems ranging in size from a fraction of a mile to hundreds of miles across will be observed simultaneously by the satellites, ships, and planes at sea and a

network of land stations in Latin America, South America, and Africa.

About half of the participating ships will be stretched across the Atlantic at 300- to 600-mile intervals, and the other half will be concentrated within a 200,000-square-mile area 600 miles west of Africa to study tropical cumulus clouds and cloud clusters in detail.

*D. Spink*

Saturday, May 4, 1974.....TO MY SCIENTISTS

Weeks ago...my psychic brain picked up the knowledge that the SLA Patricia Hearst kidnapper group...was crossing the United States, leaving their numerous San Francisco hideouts because of the "heat"...and were in fact leaving the area until things cooled down. Before receiving this psychic impression...I had gone to a lot of trouble and expense to offer my services as a psychic, both to the authorities, and to the Hearsts. But I received no answer from either...so I sat on this latest information until it could come out over some radio show or other. (I'll tell you this now...I am tired of offering my tremendous psychic ability...to persons, and authorities...who simply ignore it. From now on...they'll have to come to me.)

All right. On Friday, April 19, 1974, I was going into the Virginia National Bank here in Cape Charles...and to my astonishment two negroes emerged through the front door...leaving the bank as I went in...and one of the negroes was the absolute, accurate image and description of the "Zebra Killer" composite drawing (from San Francisco witnesses) that had appeared in the Virginian-Pilot newspaper that very day. I hurried home and telephoned the Cape Charles police. Charlie Powell answered the call...I gave him this information and he said "okay". Today (date above) an article appeared in the Virginian-Pilot to the effect that the FBI yesterday disclosed that an alert had been issued in the Carolinas and Florida for suspected members of the Symbionese Liberation Army, wanted for the kidnapping of Patricia Hearst.

So I called the Norfolk FBI today...and told them of my notifying the police here at Cape Charles of having seen the "Zebra Killer" here in Cape Charles, on April 19.

So here, speaking as a master psychic...is my information to you:

- (1) The Symbionese Liberation Army and the Zebra Killers are one and the same group. Killing innocent whites...is the SLA method of getting new "muscle" recruits...and in carrying out the torture and killing of a white...the SLA knows for sure that they are not getting an FBI undercover agent into their group. (Of course, the killings are closely watched and monitored by the SLA overseers.)
- (2) The SLA/Zebra group has crossed the United States (or most of them) in camper trucks, and are indeed now on the East Coast...hiding out in their campers and with negro friends who will hide them, and supply them with East Coast guns which have been stolen on the East Coast. Some SLA girls will be dressed as male hippies...with shaved heads and wearing a man's wig and clothes. Patricia Hearst herself may well be disguised in this manner.
- (3) (This prediction has nothing at all to do with the above...but will give it to you just the same)...President Nixon will collapse and go into hospital sometime this year for an operation...stomach area.

Ted Owens (PK Man)

SCIENTISTS

Very important! (1) UFO appeared in my Virginia "target" area in my collaboration experiment with Dr. Fogel, and allowed itself to be photographed to validate my experiment.

(2) UFO appeared in my Dallas Miracle, and allowed itself to be photographed to validate my experiment-demonstration also.

It is very important...that you make note of this fact!

year, 1974.

On that show, being skeptical of the claims of Owens that he could cause weather to be controlled over an area...by collaborating with UFO's that he alleges to communicate with, and work with...I requested to Owens, with my Texas audience listening, that he make it snow at that time in Texas. (The weather was unusually warm, and it certainly would have been 'freakish'.) But Owens declined, saying that that was not how he did things.

Then Owens sent me a letter, stating that he, working with the UFO's, would produce a "major demonstration" of weather control over Texas. Following Owens' letter...Texas was struck by an earthquake, 4.5 on the Richter Scale.

Then Texas was struck by high-wind and tornados.

Then Texas had the coldest weather occur ever in its history.

Then Texas was struck by hot winds...that destroyed half of the Texas wheat crop.

I am submitting this statement of fact to Owens at his request.

It is true and accurate to the best of my knowledge.

Whether Owens had any connection with the above weather phenomena, I do not know; perhaps it was mere coincidence.

But I am stating the plain facts as they occurred, at Owens' request.

## Texas Panhandle Wheat Lost

AMARILLO, Tex. (AP) — The Texas Panhandle's dryland wheat crop is lost, the victim of a severe drought, bugs, and several weeks of hot, blustery winds.

The cost to farmers: \$160 million, perhaps more.

Officials in Washington say the impact nationally is minimal. The U.S. Department of Agriculture says that with the exception of some drought areas of New Mexico and western Texas, this year's crop is "generally good in all areas of the nation." And dealers note that wheat prices, while somewhat higher, don't appear to be reflecting the Texas drought.

But the economy of the Panhandle, already crippled by plunging cattle prices, is headed for another shock.

Texas usually produces about 5

per cent of the nation's wheat, much of it grown in the Panhandle.

If there had been a decent rainfall by April 15, some of the crop might have been salvaged. There was little rain.

"In this immediate area I don't think any dryland wheat can be saved," says Arnold Prichard of the Producer's Grain Corp.

With no water, the wheat never had a chance. Any sprigs surviving the dry spell were snipped off by insects, mostly green bugs.

Even irrigated wheat has suffered from drought and bugs. "Our irrigation wells have to have some help from mother nature," says Milton Johnson of the Producer's Grain Corp.

Prichard tells of an irrigation farmer near Bovina, Tex., who watered his 600 acres five times, sprayed insecticide three times,

and says now: "Hell, even if wheat was \$5 a bushel I couldn't get my money out of it."

Knowledgeable producers forecast a Texas wheat crop of less than 50 million bushels, about half the 1973 harvest.

"When we have a wheat loss in Texas it touches everybody somewhere — this is spending money," says Bill Nelson, executive vice president of the Texas Wheat Producers Association.

Nelson, who put the wheat loss at \$160 million, said the loss simply plucks that much from the national cash register.

The drought is so bad that there was no young wheat suitable for cattle grazing. Farmers rent their land to cattlemen in winter and spring when the wheat is two or three inches tall, then the cattle are removed and the crop matures.

April 27, 1974...Mr. Ed Busch, Radio WFAA, Dallas, Texas

I am still awaiting the signed statement of fact...which I assume, in all fairness, you will supply me.

By that I mean...I "worked" for you...to supply your listeners in Texas with a "miracle" of freak weather, at your own instigation. Therefore a simple admission of you to the quite obvious success of same, would not be unreasonable.

Now...you can add to the "Texas Miracle File", which is what I call it...the above. So far, since your challenge and my accepting it...Texas has had (1) an earthquake, (2) a tornado attack, (3) some of the coldest weather in the entire history of Texas, and now, (4) "weeks of hot, blustery winds"...which, incidentally, seem to have knocked out the wheat crop in Texas. Sorry about that...but the SI's promised amplified heat, you know (see the original letter); and they promised a "major demonstration" in Texas, it seems...is certainly getting one! And, in variety.

Owens  
(PR Man)

✓

PS...The giant UFO is still up there, hanging over Texas, invisible...causing effect...and will not move away until I signal it to do so.

May 14, 1974

TO MY SCIENTISTS

As if the Texas Miracle I have just completed...was not enough...now you have more!

See the Ed Busch file I sent you...note that I talked with Mr. Busch, live on Radio program out of Dallas (by telephone hook-up)...and told him that at that moment there was a giant UFO over Dallas...with the purpose of creating "freak" weather there, in Texas. (Following which came an attack of tornados; record cold; and hot winds that wiped out half the wheat crop. I had previously given him a statement in writing that I would ask the UFO's to create freak weather...and four days afterward Texas had an earthquake. This just previous to the "giant UFO" remark.)

above

Now, this just occurred before the enclosed "UFO flap" over the Dallas-Fort Worth airport.

Note that Mrs. Hodgson expressed a specific opinion...that UFO's are attempting to contact humans on earth. I have explained on the Ed Busch Show, and other shows, that when a human sees a UFO...that UFO programs them for something. So, logically, I am sure that the UFO Miss Hodgson saw...programmed her to express the above opinion.

Therefore...it is quite exciting...that after I had stated over live radio to Dallas, Texas...that a giant UFO was indeed there...then these UFO sightings occurred (and an actual photo was taken)! Not to mention the concrete "proof" of the freak weather that appeared on cue...to substantiate my statements!

It all ties together into a complete picture. Yes?

One other tiny detail...which is significantly interesting to me. The UFO in the newsclip...shined down its searchlight on a Mexican family. Now, on the Ed Busch Show I went into great detail, not once, but on two different radio shows...of how the UFO's modified my brain while I was isolated on the desert IN MEXICO! (Many times before I have explained to you how the SI's "talk" by their actions; i.e., the Bigfoot that grabbed Mrs. Owens' hair at Grosse Point, Michigan...the UFO in the target area of Virginia (my "Project Alien" experiment in collaboration with Dr. Fogel) seen by Policeman Owens...thus tying me to these specific happenings.)

So...here in this file...you have more explosive material yet. Please add it to the "Ed Busch Radio Show" file.

 Owens

# Are UFOs taking 'a look at Dallas-Fort Worth airport?

By BILL CASE

Times Herald Metropolitan Staff

Are Unidentified Flying Objects (UFOs) and their crews maintaining regular observation vigils on a hill along the west boundaries of the Dallas-Fort Worth Airport at night?

Five witnesses from three families have told airport officials and Federal Aviation Administration officers they believe something like that may be happening.

All report numerous UFO takeoff sightings and extremely low level flights westward away from the airport during the hours of darkness between 9 p.m. and 1 a.m. The flights

occurred during the last six to eight months, they said.

Mrs. Sandra Hodgson, 36, a medical technician employed at Irving Community Hospital, who lives in an apartment complex at 2805 Mustang Drive, Grapevine, told The Times Herald she has had numerous sightings en route home from work.

"After sighting the lights, which seem to travel and hover at just about tree-top level, on several nights I reported the UFOs to the FAA control tower at D-FW Airport and to George Burlidge at the FAA's Fort Worth regional headquarters," she said.

"They advised me to try and get a picture of one so I got out my camera on Thursday night and, when a UFO appeared east of our apartment building about 200 yards away, I took a shot."

Mrs. Hodgson's picture shows a small jagged twisting yellow light against a pitch black sky. No size or shape of the object is discernable. However, it appears to be moving west from left to right in the classic patterns of the UFO flights away from D-FW airport.

Fascinated by the phenomenon, Mrs. Hodgson said one night last week while watching the unusual lights she and a friend, Debbie Carter, 17, who lives in the same apartment complex, got in their car and followed it.

"It stopped down a small road over a patch of woods about a mile east of us and beamed a strong white searchlight down into a clearing," she said.

"When we got there the light was still hovering in the air over a clearing where a Mexican-American family live in a converted construction building."

Mrs. Hodgson and Miss Carter said they found Mr. and Mrs. Lucio Perez and his brother, Leonardo Perez, standing in the clearing looking up at the light.

Perez, who does not speak English, took Mrs. Hodgson's photo of the UFO and pointed to the same place in the sky where she and Miss Carter said they saw the object with its searchlight hovering directly over them."

He also indicated with gestures the UFO lights appeared to be coming from the field at the edge of the airport. The point they indicated where the lights took off is on a hill providing a panoramic view of the entire airport.

Reporters who trudged through high grass and weeds to the fence line reported they found a circular area of grass and weeds about 20 feet in diameter twisted down in a clockwise pattern. It appeared something had set down on them.

Mrs. Hodgson, who said many of her neighbors have seen the lights but do not like to discuss them, believes occupants of the UFOs are attempting to contact humans on earth.

"But judging from accounts of the way people have acted toward UFOs and their occu-

pants in other sightings elsewhere, I guess they feel we are hostile," she said. "But I'd

give anything to contact them."

The only noise Mrs. Hodgson said she has heard during a sighting was a hum similar to that of an electric generator.

**UFO SIGHTING?**—The tiny light appearing in a twisting pattern in this photo is a UFO which Mrs. Sandra Hodgson of Grapevine says is keeping watch on the Dallas-Fort Worth Airport.

**FOUR OF THE FIVE** witnesses who say they have seen numerous UFOs taking off at night from a remote, western area of the Dallas-Fort Worth Airport point to the spot they say one of them landed in a clearing in the woods.

Mr. Ted Owens  
Box 48  
Cape Charles, Virginia 23310

Dear Mr. Owens:

I am one of the Ed Busch Talk Show "faithfuls" and  
your appearances on the Show are indeed high points  
as far as I am concerned.

Am enclosing an intriguing write up which appeared in  
the 12 May Dallas Times Herald. I feel quite certain  
YOU know the UFO are there. The interesting thing is  
it is a RARE occasion that a newspaper will give print  
to such a report.

I would much appreciate receiving one of your discs  
if I'm approved.

Thank you.

Sincerely,

*Jean S. Cabeen*

April 29, 1974

Ted,

Just a note wondering if you could be available for a short phone interview on Friday, the 3rd of May. I've had many calls from listeners wondering when you are going to appear on the show again and I thought this Friday would be a good night seeing that we have the most listenership on that day.

I've been getting all the mail you have been sending and unfortunately I have lost the verification paper that you wanted me to sign. I would appreciate it if you would send along another.

Either myself or my wife, Michele, will give you a call sometime this week to see if the Friday appearance would be possible for you.

Talk to you then.

Sincerely,

  
Ed Busch

Saturday, May 4, 1974....TO MY SCIENTISTS

Weeks ago...my psychic brain picked up the knowledge that the SLA Patricia Hearst kidnapper group...was crossing the United States, leaving their numerous San Francisco hideouts because of the FBI "heat"...and ~~XXXXXX~~ were in fact leaving the area until things cooled down. Before receiving this psychic impression...I had gone to a lot of trouble and expense to offer my services as a psychic, both to the authorities, and to the Hearsts. But I received no answer from either...so I sat on this latest information until it could come out over some radio show or other. (I'll tell you this now, I am tired of offering my tremendous psychic ability...to persons and authorities...who simply ignore it. From now on...they'll have to come to me.) All right. On Friday, April 19, 1974, I was going into the Virginia National Bank here in Cape Charles...and to my astonishment two negroes emerged through the front door...leaving the bank as I went in...and one of the negroes was the absolute, accurate image and description of the "Zebra Killer" composite drawing (from San Francisco witnesses) that had appeared in the Virginian-Pilot newspaper that very day. I hurried home and telephoned the Cape Charles police. ~~XXXXXX~~...I gave ~~them~~ this information and they said "okay". Today (date above) an article appeared in the Virginian-Pilot to the effect that the FBI yesterday disclosed that an alert had been issued in the Carolinas and Florida for suspected members of the Symbionese Liberation Army, wanted for the kidnapping of Patricia Hearst. So I called the Norfolk FBI today...and told them of my notifying the police here at Cape Charles of having seen the "Zebra Killer" here in Cape Charles on April 19.

So here, speaking as a master psychic...is my information to you:

- (1) The Symbionese Liberation Army and the Zebra Killers, <sup>(Death Angels)</sup> are one and the same group. Killing innocent whites...is the SLA method of getting new "muscle" recruits...and in carrying out the torture and killing of a white...the SLA knows for sure that they are not getting an FBI undercover agent into their group. (Of course, the killings are closely watched and monitored by the SLA overseers.)
- (2) The SLA/Zebra group has crossed the United States (or most of them) in camper trucks, and are indeed now on the East Coast...hiding out in their campers and with negro friends who will hide them, and supply them with East Coast guns which have been stolen on the East Coast. Some SLA girls will be dressed as male hippies...with shaved heads and wearing a man's wig and clothes. Patricia Hearst herself may well be disguised in this manner.
- (3) (This prediction has nothing at all to do with the above...but will give it to you just the same)...President Nixon will collapse and go into hospital sometime this year for an operation...stomach area.

*I also, soon Nixon will do*

Ted Owens (PK Man)

*something wild and sensational... something real goofy... that not even his friends, his family, Owens or his lawyers would dream he'd do!!*

PS...the enclosed material...tells a fascinating story. (1) Either I actually SAW the Death Angels "Zebra Killer" here at the bank, as I reported to the local police on April 19 (see statement)...and bear in mind that no inkling at that time placed either SLA members or Death Angels on the east coast...

OR (2) my fantastic psychic ability picked them up here in this area...compelling me to report it! (SEE ENCLOSED NEWSCLIPS)

Saturday, May 4, 19874

Ted Owens, the psychic who lives here in Cape Charles, Virginia...telephoned the police here in Cape Charles on Friday, April 19, 1974...

He <sup>STATED</sup> that as he had entered the Virginia National Bank, in Cape Charles, that morning...a negro had been leaving the bank...and Owens stated that he was positive that the negro was the very same one whose face was shown in the Virginian-Pilot newspaper that morning as the San Francisco "Zebra Killer." (A composite drawing made up from the description of witnesses in San Francisco.) Owens stated that this negro's face was absolutely identical...to that of the "Zebra Killer" of San Francisco, and Owens stated also that he wondered why this killer would be so far away from San Francisco. He said that the negro was accompanied by another, larger negro. He also stated that he had never seen either of the two negroes in Cape Charles before.

This is a true and accurate statement.

  
Officer Charles Powell  
Cape Charles Police (Virginia)

Virginian-Pilot, Friday, April 19, 1974 A7

## Massive Hunt for 'Zebra Killer'

Police composite drawings of the killer (UPI)

SAN FRANCISCO (UPI)—Police Thursday stopped, questioned, and searched hundreds of young blacks in a hunt for "Zebra" suspects in San Francisco's 18 random street shootings since November, 12 of them fatal.

One hundred and fifty officers, organized in special teams, were deployed in six zones of the city where the slayings occurred.

The officers carried composite drawings of the killer, or one of the killers, presenting him as a black between 5 feet 9 and 6 feet of slender medium build with a moustache and frequently wearing a watch cap.

Robert Brooks, 23, attired in a long black coat and a knit hat while waiting for a bus, said he was spotted by plainclothes men and interrogated in their car for 20 minutes. Meanwhile, traffic and other checks were conducted on him by radio.

"Wow," said Brooks, a private security guard, "one of the first things I'm going to do is get rid of this knit cap."

## SLA Alert in South

COLUMBIA, S.C. (UPI) — The FBI Friday disclosed that an alert had been issued in the Carolinas and Florida for suspected members of the Symbionese Liberation Army, wanted for the kidnaping of Patricia Hearst.

Harold C. Swanson, special agent in charge of the South Carolina FBI office, said Marlboro County authorities had received an anonymous telephone tip that a black male, believed to be a member of the SLA, had attempted to purchase a gun in the

small town of McColl. The town is located just south of the border with North Carolina.

Swanson emphasized that there was "nothing concrete at this time" but he said authorities were running a thorough investigation, which included an alert for a blue automobile in South Carolina, North Carolina, and Florida.

Swanson said the car was carrying three black males and two females, one of whom was white. May 4, 1974

## 5/5/74 N.C. Alert Issued for 'Hearst Car'

CHARLOTTE, N.C. (AP)—A statewide alert was issued in North Carolina Saturday for a red late-model car with California license plates which police said may have carried a passenger who resembled Patricia Hearst.

Capt. R. E. Phillips, who issued the alert, said a woman told police that she saw the car, a Buick, going north from Charlotte Saturday. The woman said the car contained three black males and one white female who met the general description of Miss Hearst, Phillips said.

Phillips said he had no other indication that the 20-year-old daughter of newspaper executive Randolph A. Hearst or members of the Symbionese Liberation Army were in the state. The SLA has claimed responsibility for kidnaping Miss Hearst from her apartment in Berkeley, Calif., on Feb. 4.

"The reason I authorized this to be put out is that I don't want a police officer to approach this car if this is the SLA or members of it or anything like it," he said. "I don't want them walking up on this car without knowing what they were approaching and getting blown in two."

5/6/74

## No More On Car Sighting

MONROE, N.C. (UPI) — North Carolina authorities Sunday said there had been no further reports on a car seen Saturday carrying three black men and a woman resembling kidnaped heiress Patricia Hearst.

An alert remained in effect for the red Buick with California license plates, but Charlotte Police Capt. R. E. Phillips said, "I haven't heard of anyone stopping one."

The car, according to a witness, was seen at an intersection here early Saturday carrying three black men and a white woman who fit "the general description of Patricia Hearst," said Phillips.

The FBI in Charlotte declined to comment on the reports.

"I had a decision to make," Phillips said. "There aren't that many red Buicks with California plates in this state. If some officer had approached such a car not knowing about this report and gotten killed, I could never have slept again."

He said the witness said he spotted the car about 6:45 a.m. at the intersection of U.S. 74 and U.S. 601. Monroe is about 30 miles southeast of Charlotte.

Saturday's report was the second in as many days. South Carolina officials Friday said they received an anonymous tip that a man, who resembled a member of the Symbionese Liberation Army that claimed credit for the Hearst kidnaping, attempted to buy a gun in McColl, a small city near the South Carolina-North Carolina border about 80 miles from Charlotte.

The original alert, issued by the FBI in the Carolinas, Georgia, and Florida, was for a blue car carrying three black men and two women, one white and one black.

"There's no telling where these people are at," Phillips said. "We're not taking it lightly. We're checking it out."

Saturday, May 4, 1974.....TO MY SCIENTISTS

Weeks ago...my psychic brain picked up the knowledge that the SLA Patricia Hearst kidnapper group...was crossing the United States, leaving their numerous San Francisco hideouts because of the FBI "heat"...and were in fact leaving the area until things cooled down. Before receiving this psychic impression...I had gone to a lot of trouble and expense to offer my services as a psychic, both to the authorities, and to the Hearsts. But I received no answer from either...so I sat on this latest information until it could come out over some radio show or other. (I'll tell you this now...I am tired of offering my tremendous psychic ability...to persons, and authorities...who simply ignore it. From now on...they'll have to come to me.) All right. On Friday, April 19, 1974, I was going into the Virginia National Bank here in Cape Charles...and to my astonishment two negroes emerged through the front door...leaving the bank as I went in...and one of the negroes was the absolute, accurate image and description of the "Zebra Killer" composite drawing (from San Francisco witnesses) that had appeared in the Virginian-Pilot newspaper that very day. I hurried home and telephoned the Cape Charles police. Charlie Powell answered the call...I gave him this information and he said "okay". Today (date above) an article appeared in the Virginian-Pilot to the effect that the FBI yesterday disclosed that an alert had been issued in the Carolinas and Florida for suspected members of the Symbionese Liberation Army, wanted for the kidnapping of Patricia Hearst. So I called the Norfolk FBI today...and told them of my notifying the police here at Cape Charles of having seen the "Zebra Killer" here in Cape Charles, on April 19.

So here, speaking as a master psychic...is my information to you:

- (1) The Symbionese Liberation Army and the Zebra Killers are one and the same group. Killing innocent whites...is the SLA method of getting new "muscle" recruits...and in carrying out the torture and killing of a white...the SLA knows for sure that they are not getting an FBI undercover agent into their group. (Of course, the killings are closely watched and monitored by the SLA overseers.)
- (2) The SLA/Zebra group has crossed the United States (or most of them) in camper trucks, and are indeed now on the East Coast...hiding out in their campers and with negro friends who will hide them, and supply them with East Coast guns which have been stolen on the East Coast. Some SLA girls will be dressed as male hippies...with shaved heads and wearing a man's wig and clothes. Patricia Hearst herself may well be disguised in this manner.
- (3) (This prediction has nothing at all to do with the above...but will give it to you just the same)...President Nixon will collapse and go into hospital sometime this year for an operation...stomach area.

# Are UFOs taking a look at Dallas-Fort Worth airport?

DALLAS TIMES HERALD, Sun. May 12, 1974 ... A-9

By BILL CASE

**Are Unidentified Flying Objects (UFOs) and their crews maintaining regular observation vigils on a hill along the west boundaries of the Dallas-Fort Worth Airport at night?**

Two witnesses from three families have told airport officials and Federal Aviation Administration officers they believe something like that may be happening.

All report numerous UFO takeoff sightings and extremely low level flights westward away from the airport during the hours of darkness between 9 p.m. and 1 a.m. The flights occurred during the last six to eight months, they said.

Mrs. Sandra Hodgson, 38, a medical technician employed at Irving Community Hospital, who lives in an apartment complex at 2005 Mustang Drive, Grapevine, told The Times Herald she has had numerous sightings on route home from work.

"After sighting the lights, which seem to travel and hover at just about tree-top level, on several nights I reported the UFOs to the FAA control tower at DFW Airport and to George Burdette at the FAA's Fort Worth regional headquarters," she said.

"They advised me to try and get a picture of one so I got out my camera on Thursday night and, when a UFO appeared east of our apartment building about 200 yards away, I took a shot."

Mrs. Hodgson's picture shows a small jagged twisting yellow light against a pitch black sky. No size or shape of the object is discernable. However, it appears to be moving west from left to right in the classic patterns of the UFO flights away from DFW airport.

Fascinated by the phenomenon, Mrs. Hodgson said one night last week while watching the unusual lights she and a friend, Debbie Carter, 17, who lives in the same apartment complex, got in their car and followed it.

"It stopped down a small road over a patch of woods about a mile east of us and beamed a strong white searchlight down into a clearing," she said.

"When we got there the light was still hovering in the air over a clearing where a Mexican-American family live in a converted construction building."

Mrs. Hodgson and Miss Carter said they found Mr. and Mrs. Lucio Perez and his brother, Leonardo Perez, standing in the clearing looking up at the light.

Perez, who does not speak English, took Mrs. Hodgson's photo of the UFO and pointed to the same place in the sky where she and Miss Carter said they saw the object with its searchlight hovering directly over them.

He also indicated with gestures the UFO lights appeared to be coming from the field at the edge of the airport. The point they indicated where the lights took off is on a hill providing a panoramic view of the entire airport.

Reporters who trodged through high grass and weeds to the fence line reported they found a circular area of grass and weeds about 20 feet in diameter twisted down in a clockwise pattern. It appeared something had set down on them.

Mrs. Hodgson, who said many of her neighbors have seen the lights but do not like to discuss them, believes occupants of the UFOs are attempting to contact humans on earth.

"But judging from accounts of the way people have acted toward UFOs and their occupants in other sightings elsewhere, I guess they feel we are hostile," she said. "But I'd give anything to contact them."

The only noise Mrs. Hodgson said she has heard during a sighting was a hum similar to that of an electric generator.

## Icy front "freak weather" and heat Freeze nips Dallas debut of spring

Somebody forgot to shut the door on winter, or so it seemed Thursday for North Texans who stepped out on the first full day of spring.

A spine-shivering low of 31 degrees was recorded at 8 a.m. Thursday, not a new record but sharply contrasting with readings in the 30s in which residents hunkered last week.

The coldest March 21, when it was 27 degrees, was in 1965.

More cold weather was predicted for early Friday morning. A low temperature of 30 degrees will pose hazards for numerous varieties of flowers and other early blooming plants, National Weather Service forecasters said.

Partly cloudy skies Friday were predicted to accompany slightly warmer readings, in the upper 30s.

Thursday's wind gusts up to 25 m.p.h., following a fast-moving cold front, will diminish by Friday morning, according to weather forecasters.

Precipitation was forecast for some parts of Texas Thursday, ranging from possible showers and thunderstorms in the north to occasional snow in the Panhandle.

Large areas of the state were under cornucopia watches Wednesday night and at least two were reported on the ground.

One hit the southeast town of San Augustine, felling trees and toppling trailer homes. At one trailer park, one person was injured. A tree fell on a passing automobile, but no one was hurt.

Another twister hit the ground four times in Beaumont, but did little damage. No injuries were reported.

Temperatures were spread across a wide range. Amarillo shivered Wednesday under a high reading of 48. McAllen sweltered in 96-degree heat, the highest in the nation.

An official 5.1 inch of rain Wednesday pushed the Dallas total for 1974 to 2.57 inches, compared to the normal 5.79 inches that fall through the month.

Normal high temperature in Dallas this date is 82 degrees.

## Texas Panhandle Wheat Lost

AMARILLO, Tex. (AP) — The Texas Panhandle's dryland wheat crop is lost, the victim of a severe drought, bugs and several weeks of hot, blustery winds.

The cost to farmers: \$140 million, perhaps more.

Officials in Washington say the impact nationally is minimal. The U.S. Department of Agriculture says that with the exception of some drought areas of New Mexico and western Texas, this year's crop is "generally good in all areas of the nation." And dealers note that wheat prices, while somewhat higher, don't appear to be reflecting the Texas drought.

But the economy of the Panhandle, already crippled by plunging cattle prices, is headed for another shock.

Texas usually produces about 5

per cent of the nation's wheat, much of it grown in the Panhandle.

If there had been a decent rainfall by April 15, some of the crop might have been salvaged. There was little rain.

"In this immediate area I don't think any dryland wheat can be saved," says Arnold Prichard of the Producer's Grain Corp.

With no water, the wheat never had a chance. Any sprigs surviving the dry spell were snipped off by insects, mostly green bugs.

Even irrigated wheat has suffered from drought and bugs. "Our irrigation wells have to have some help from rockier nature," says Milton Johnson of the Producer's Grain Corp.

Prichard tails of an irrigation farmer near Bovine, Tex., who watered his 500 acres five times, sprayed insecticide three times,

and says now: "Hell, even if wheat was 15 a bushel I couldn't get my money out of it."

Knowledgeable producers forecast a Texas wheat crop of less than 50 million bushels, about half the 1973 harvest.

"When we have a wheat loss in Texas it touches everybody somewhere — this is spending money," says Bill Nelson, executive vice president of the Texas Wheat Producers Association.

Nelson, who put the wheat loss at \$140 million, said the loss simply picks that much from the national cash register.

The drought is so bad that there was no young wheat suitable for cattle grazing. Farmers rent their land to cattlemen in winter and spring when the wheat is two or three inches tall, then the cattle are removed and the crop matures.

## Tornadoes Kill 6; Damage Is Heavy

By The Associated Press  
Tornadoes and high winds swept across the Southeast Thursday, leaving six persons dead and scores injured and causing widespread damage. Winds reached up to 100 miles per hour at Columbus, Ga., where a meteorologist with the National Weather Service said, "It's the strongest wind I've ever seen in the continental United States."

The weather service said the storm system developed over Texas Wednesday night, then moved rapidly to the northeast, carrying a mass of cold air that clashed with warm, moist air over the Southeast.

The system grew as it moved northeastward and at one point extended 1,000 miles from Virginia south to Georgia and west to Louisiana, according to the weather service.

Most of the damage came in predawn hours.

In Natchitoches, a city of 18,000 in northern Louisiana, a tornado left a 40-block residential area "a mass of rubble," according to a policeman. Mayor

Ray Scott said it was the worst disaster in the city's history and damage could run into millions of dollars.

A 69-year-old resident, suffered a fatal heart attack as he sought shelter under a bridge. In Ebarb, another northern Louisiana community hit by a twister, another man was killed when a building collapsed.

Four persons were killed in Georgia, including a bride of four weeks who was apparently crushed when her mobile home in Montezuma was lifted off its foundation and blown 20 feet.

Third for Town

Another tornado bit Coonasauga, Tenn. It happened before on the same date in 1932 and again last December. Six homes were demolished and several others were damaged. Six persons were injured.

At least 20 persons were injured in Alabama. A boy was severely burned when he touched a fallen power line.

A tornado struck Madison General Hospital at Canton, Miss., causing three minor injuries to patients, authorities said. Four persons were hurt at Utica when high winds hit some mobile homes.

There were unofficial reports of tornadoes in South Carolina, but no injuries were reported. In Jay, Fla., one mile south of the Alabama line, sheriff's deputies said a tornado touched down briefly and caused one minor injury.

Virginian-Pilot, Saturday, Feb. 16, 1974

## Panhandle Quake Rocks 3 States

PERRYTON, Tex. (AP) — An earthquake centered in the Panhandle shook parts of Texas, Oklahoma, and Kansas Friday. There were no reports of injuries.

It "shook the rafters," said Mrs. Richard Burke of Perryton.

The United States Geological Service said some walls were cracked in Perryton but no major damage was reported.

The service said the quake was located between Perryton and Borger, Tex. The seismograph center at Boulder, Colo., said the center was 10 miles south of Perryton.

It also was felt in Spearman, Pampa, and Borger and surrounding Texas towns, and in Coryton, Goodwill, and Hardisty, Okla., and Liberal, Kan.

The Geological Service said the tremor registered between 4 and 4.5 on the Richter scale.

The Richter scale is a measure of ground motion recorded on a seismograph. Every increase of one number means a 10-fold increase in magnitude. A quake with a reading of 4 can cause moderate damage and one of 5 considerable damage.

A man in Beaver, Okla., said the tremor caused dishes to rattle in his home and also resulted in a few minor cracks in the walls.

"We heard a sort of rumbling and felt it for a few seconds," said George Riffe, a resident of Baker, Okla.
