Answer

2805 N. Mc Carver
Tacoma, Wash. 98403
July 23, 1974

Dear Ted,

It is past due time that I reported to you. According to my Doctor my cancer of the pancreas is under complete control, thanks to your disc. Here is how I work with my disc: I pray to God thanking him ^{for} letting the people in outer space help me in keeping the disc charged. I follow my Doctor's orders and think good things of others.

Now for a question. How would or could I tell if the people of outer space make contact with me? Recently I have been seeing a golden light like lightning, while this is appearing it is multi color with the gold and constantly moving within its self. Like this drawing:

 seems to be moving with

While this is happening I have no sense of anything except seeing this jagged lightning like light. Can you explain this?

Mrs. Howard did not make it. Her cancer was too far advanced by the time she received her disc.

Did you notice my new address from 1215 So. Oakes to 2805 N. Mc Carver?

I am enclosing \$5.00 to help you to keep up the good things you are doing.

Very truly,

Bob
